Contrôleur ADJ Wifly WLC16 16 groupes de 16 canaux

The ADJ WIFLY WLC16 is a 19-inch rack mount, 16-channel DMX Controller with ADJ's WiFLY, wireless DMX built-in. It allows users to control ADJ WIFLY compatible products wirelessly without the use of DMX cables. It has a built-in antenna that sends the wireless DMX signal to other WIFLY products. There is also a 3 pin XLR, DMX out onboard so that signals may also be sent via DMX cables to non-WiFLY products.

The WIFLY WLC16 supports up to 16 fixtures each with up to 32 DMX channels, 30 banks of 16 programmable scenes each, and 6 programmable chases of 480 scenes each. Other features include a backlit digital display, SD card slot to save shows from the WIFLY WLC16 controller and a built-in microphone for sound triggering.
